

# THREE CARD POKER

The rules for Three Card Poker at this casino, set out below, are our commitment to the players in ensuring that the gambling we offer is 'Fair and Open'. In the event of a dispute resulting from any ambiguity in the rules, the decision shall always be in the player's favour until that ambiguity has been resolved.

- Three Card Poker is dealt with a single deck of 52 cards.
- The player plays against the Dealer/House.
- The player must place their bets prior to any cards being dealt. No bets can be changed or altered after any cards have been drawn.
- Players are only allowed to play one hand.
- The wager(s) is valid for one hand only.
- Players must place an initial bet on either the Ante, Pair Plus or both.
- Players must have an Ante, Pair Plus or both to play the Prime wager.
- Three cards are dealt face down to each player and the Dealer.
- After all the cards have been dealt, the players may examine their hands. If they decide to fold and do not wish to proceed they will lose their Ante bets.
- If they wish to proceed, they place a bet in the Play box. This bet must be equal to the amount of the Ante bet.
- Players with a Pair Plus and/or Prime bets can continue in the game as these wagers are not determined on the outcome of the Dealer's hand.
- The relative value of each of the cards is as follows (in descending order): Ace, King, Queen, Jack, Ten, Nine, Eight, Seven, Six, Five, Four, Three, Two, except that the Ace may be used as a value of one in order to complete a straight flush or a straight, being 3, 2, Ace.
- The terms used to describe the hands held by a participant in the game, and the ranking of hands from highest to lowest, are as follows:
  - Straight flush – three cards of consecutive values of the same suit;
  - Three of a kind – three cards of the same value;
  - Straight – three cards of consecutive values of different suits;
  - Flush – three cards of the same suit not being a straight flush;
  - Pair – two cards of the same value;
  - High card – the highest value single card;
- When all players have made their decisions, then the Dealer will declare their hand.
- The Dealer only qualifies to play if they have a Queen high or better hand.
- If the Dealer does not qualify to play, then all players remaining in the game will win 1-1 on the Ante bet. In addition they will win the appropriate odds on the Ante Bonus and the Pair Plus if their hand qualifies.
- If the Dealer does qualify, and their hand outranks the player's hand, then the player's Ante and Play will be lost to the House.
- If the Dealer does qualify, then players whose hand outranks the Dealer's hand are paid 1 to 1 on the Ante and Play bets.
- If the Dealer's and players hands are exactly the same i.e. Tied, then this is deemed a stand off and all Ante/Play bets are void. However, the Pair Plus, Prime and Ante Bonus bets will be paid at the appropriate odds.
- The Pair Plus is an additional wager that the player's cards show a pair or better and will be paid at the appropriate odds irrespective of the Dealer's hand.
- If their Pair Plus wager is not a pair or better then this will be lost to the House.
- The following odds are paid for the Pair Plus and Ante Bonus regardless of the Dealer's hand
 

<p><b>PAIR PLUS</b></p> <ul style="list-style-type: none"> <li>i) Pair (1 to 1)</li> <li>ii) Flush (4 to 1)</li> <li>iii) Straight (6 to 1)</li> <li>iv) Three of a Kind (33 to 1)</li> <li>v) Straight Flush (35 to 1)</li> </ul>	<p><b>ANTE BONUS</b></p> <ul style="list-style-type: none"> <li>i) Straight (1 to 1)</li> <li>ii) Three of a Kind (4 to 1)</li> <li>iii) Straight Flush (5 to 1)</li> </ul>
--	---

## PRIME

- The Prime bet is an additional wager that the player's cards will be of the same colour. Should also the dealer's cards be of the same colour this increases the odds paid out to them.
- If their Prime hand does not constitute cards of the same colour, then this wager will be lost to the House.
- If their Prime wager show cards of the same colour and the dealer's cards are also of the same colour, it will be paid out at the appropriate odds below:
 

Both the Player and Dealer's cards are all of the same colour (4 to 1)
Player cards of the same colour (3 to 1).
